

PIXEL

The most exciting innovations develop when you have the freedom to think playfully. The challenge is to create a place that naturally compliments day-to-day working life - culturally and spatially. It is becoming particularly important to create zones in the office that promote a lively group dynamic.

Furniture that is as flexible and unfussy as the team itself can help to create such a space. PIXEL provides the answer. These ingenious little boxes can be put together to make various different pieces of furniture. Whether it's a table, storage unit, seating area or all three at once – PIXEL always plays along.

COLOURS & MATERIALS

PIXEL Box

Untreated nature

Information

Wood is a natural product whose growth might result in colour differences and irregularities. The wood is subject to differences in structure and colour between parts of one furniture item or compared to other furniture items of the same material. As long as they remain within the nature of the materials used and are customary in trade, they do not constitute cause for a warranty claim.

To satisfy the visual standards, PIXEL is deliberately made with untreated pine plywood and may contain knots as well as cracks in the surface layers. These design characteristics are proof of authenticity and not a valid reason for complaint.
