

Muse is a wide family of comfortable living room furniture, which - in addition to such traditional elements as a sofa, ottoman and armchair - also includes a daybed/lounger, round pouffes and a bench.

A characteristic feature of the Muse collection is the rectangular armrest cushion positioned at an angle to the inside of the seat. Geometric backrests consist of a harder body and soft support and they are combined in one form with their joint upholstery material.

Backrest and armrests' cushions, due to their softness, can be visibly wrinkled, even if they are not used. The intensity of wrinkles depends mainly on the type and stiffness of the fabric or skin. Seats, which can be ordered on a wooden oak base or with lacquered legs, are supplemented by tables of various shapes and heights, including an oval coffee table. Apart from the oak veneer, table tops are also made of a material new to NOTI - white and black terrazzo.

For tables with terrazzo tops, the designer recommends black varnished legs. This color should also be chosen in the case of seats with a metal base.
